Frédéric Forster

Software Engineer | Full Stack & Systems Developer

Software Engineer with a master's from Epitech, specializing in full-stack development, system programming, and DevOps. Proficient in designing efficient, scalable solutions across front-end, backend, and system architectures, with expertise in React, Node.js, C/C++, and Unix scripting. Focused on delivering high-performance applications with seamless cross-platform integration and optimized workflows.

Experience

Personal | Portfolio Project - Full-Stack Developer
(2024) <https://frederic-forster.com>

Built a robust MERN stack portfolio to showcase my projects, featuring a custom RESTful API for dynamic content management and deployed on my Hostinger VPS. Developed a secure Next.js dashboard to handle CRUD operations for projects and experiences, with state management for optimized workflows and managing multilingual content to demonstrate advanced full-stack development skills.

Actimage | Software Engineer - Backend & Web Redesign
(2024)

Enhanced performance and security for French government websites. Independently programmed the complete redesign of the France Stratégie site based on provided guidelines, handling both custom modules, backend tasks, and front-end implementation.

Kimmel Group | Software Engineer - Full Stack & System Development
(2023 - 2024)

Developed a scalable intranet with role-based permissions for event coordination, document sharing, and request management. Streamlined workflows using CI/CD pipelines, ensuring secure deployments and boosting team productivity.

Reduco2 | Software Engineer - Front-End Development Lead
(2022 - 2024)

Co-founded Reduco2 and led front-end development for a platform managing tenders and calculating carbon footprints in logistics. Delivered data visualization tools, integrated cloud deployment, and improved UX, enabling clients to make data-driven decisions and reduce emissions by optimizing operations.

Wollenschneider | Software Engineer - Full Stack & DevOps
(2021) <https://wollenschneider.fr>

Developed a comprehensive website showcasing services, office locations, and a user-friendly contact form, along with dedicated pages for company presentation. Established strong online visibility from scratch, significantly enhancing client engagement and consistently attracting new visitors post-launch.

Education

Epitech | Master's in Information and Communication Technologies
(2018 - 2024) (Bac +5)

The project-based curriculum at Epitech emphasized hands-on learning and practical IT skills, highlighted by my 4th-year international exchange and the three-year Epitech Innovative Project (EIP), focusing on innovation, collaboration, and real-world problem-solving with cutting-edge technologies, complemented by 4 internships in diverse industry settings.

High school | Bilingual German Diploma in Economics and Social Sciences
(2015 - 2018)

Obtained a general high school diploma specializing in Economics and Social Sciences in a bilingual German class, awarded the distinction 'Fairly Good,' demonstrating strong academic performance and proficiency in multilingual environments.
